

Contractors Pollution and Professional Liability

Our Contractors Pollution and Professional Liability policy is designed to help protect against the uncertainty of Environmental as well as Professional Liabilities associated with contracting operation.

Contractors Pollution and Professional Liability

New methods of delivering construction projects have merged the lines of responsibility between design firms and contractors. As a result, contractors are now responsible for a wider range of activities, including construction management, design/build, supervision of subcontractors, scheduling, cost estimating, constructability reviews, value engineering, design assist services and more. This expansion of responsibilities has led to a higher professional liability risk, which is why Contractors Pollution and Professional Liability Insurance is an essential part of any contractor's risk management plan.

Our Contractors Pollution and Professional Liability (CPP) policy is a combined Pollution and Professional Liability policy that is custom tailored to address the unique risk exposures encountered by construction trade contractors, general contractors and construction managers, and help protect our Insureds against the uncertainty of Environmental as well as Professional Liabilities associated with their daily operations.
