

The Periscope Program

Your Data-Driven Solution To Reduce Risk

Periscope is an innovative and collaborative program, offering a unique perspective into customer's operations and claims experiences, empowering us to see beyond the expected and proactively prevent accidents before they happen. By leveraging the expertise of our seasoned underwriters, claims experts, and risk managers we build actionable risk management plans so you can approach your daily business activity with confidence, knowing that you have a team of experts ready to guide you towards optimal outcomes.

Benefits

- Reduction in claims by mitigating losses
- Improved safety for employees
- Less vehicle down time
- Freed up time to take business to the next level
- Insight into industry claims trends

Program Services

- Experienced claims and risk management team
- Personalized claims data reports and response summary
- Scheduled informative meetings on claims discussion and trends
- Customized training to address your specific business needs
- Risk Engineering Tools

Your Periscope Team

Underwriting Expertise

Our Underwriting Team will focus on your business and provide expertise and insights you may not know about. Policies and endorsements will be on time.

Claim Services Liaison

A Claims Services Director will be your personal liaison for any claims-related service who will facilitate finding solutions for your unique claims needs.

Risk Engineering Manager

The Risk Engineering Team will analyze the loss history to define how and where losses occur and to prevent them in the future.

The P3 Approach

This method forms a comprehensive approach to eliminate key loss drivers.

- 1. Program:** Assess the current methods and solve to help fortify against loss
- 2. Practice:** Ensure the programs are consistently put into practice
- 3. Proof:** Identify the attributes that measure the effectiveness of the program to provide proof that the program is working.
